

When the data has to hold up.

Ronan Analytics is an independent Brisbane data and AI consultancy, established in 2019. We help government, health, community services, education and industry organisations make better decisions with trusted data, responsible AI and evidence that stands up to scrutiny in a minister's office, a board paper or an audit.

We design the surveys, build the analysis, set the governance that keeps data and AI safe to use, and leave your team able to use it without us. We're independent of any software vendor or platform, so our advice is based on what fits your organisation, not what we sell.

CORE CAPABILITIES

■ Data & AI Governance

- Data governance frameworks, policies, roles and committee structures
- AI policies, guardrails and responsible-use frameworks
- Privacy, data sharing and stewardship arrangements you can defend to boards and funders

■ Data Literacy & AI Capability

- Data and AI literacy awareness surveys to establish a baseline
- Tailored capability programs and training, from the boardroom to the frontline
- DFAT-funded short courses for public sector leaders across the Asia-Pacific

■ Insights & Reporting

- Workforce, industry and community surveys, from design to reporting
- Data strategy, analytics and dashboards linked to the decisions you need to make
- Annual industry and workforce reports for peak bodies and sector organisations

■ Funding & Investment Support

- Grant applications, funding submissions and business cases
- Evidence bases that clearly show need, value and impact
- Evaluation frameworks to measure and report outcomes

HOW WE WORK

Co-designed

With the people who will use the result.

Built on what you have

Your existing systems and staff, not a platform we sell.

Handed over

With the skills and documentation so you're not dependent on us.

WHY RONAN ANALYTICS

Senior-led

The person who scopes your project delivers it. No handoffs.

Independent

We don't resell software or platforms.

Small by design

Trusted specialist associates join only when the work needs them.

Whole-of-workforce data and AI capability

An AI and data literacy program across a PHN's workforce, grounded in its board-approved AI policy and data governance framework, with an eight-domain capability framework and a baseline awareness survey.

Currently in delivery

LEADERSHIP

Jeff Pang

MANAGING DIRECTOR

Jeff leads every Ronan Analytics engagement. He brings more than 25 years' experience in data and analytics, including senior director roles at the Australian Bureau of Statistics and Queensland Government.

He works with government, health, community services and advanced manufacturing organisations across Queensland and the Asia-Pacific.

From 2022 to 2026 he chaired the Micah Projects Data Governance Committee, guiding how the Brisbane community organisation governs and uses its data.

Let's talk.

Every engagement starts with a no-obligation conversation about what you need the data to do.
