

When the data has to hold up.

Ronan Analytics is an independent Brisbane data and AI consultancy, established in 2019. We help government, health, community services, education and industry organisations make better decisions with trusted data, responsible AI and evidence that stands up to scrutiny in a minister's office, a board paper or an audit.

We design the surveys, build the analysis, set the governance that keeps data and AI safe to use, and leave your team able to use it without us. We're independent of any software vendor or platform, so our advice is based on what fits your organisation, not what we sell.

Core capabilities

Data & AI Governance

- Data governance frameworks, policies, roles and committee structures
- AI policies, guardrails and responsible-use frameworks
- Privacy, data sharing and stewardship arrangements you can defend to boards and funders

Insights & Reporting

- Workforce, industry and community surveys, from design to reporting
- Data strategy, analytics and dashboards linked to the decisions you need to make
- Annual industry and workforce reports for peak bodies and sector organisations

Data Literacy & AI Capability

- Data and AI literacy awareness surveys to establish a baseline
- Tailored capability programs and training, from the boardroom to the frontline
- DFAT-funded short courses for public sector leaders across the Asia-Pacific

Funding & Investment Support

- Grant applications, funding submissions and business cases
- Evidence bases that clearly show need, value and impact
- Evaluation frameworks to measure and report outcomes

How we work

- **Co-designed** with the people who will use the result
- **Built on your existing systems** and staff, not a platform we sell
- **Handed over** with the skills and documentation so you're not dependent on us

WHY RONAN ANALYTICS

Senior-led. The person who
scopes your project delivers it.
No handoffs to junior staff.

Independent. We don't resell
software or platforms.

Small by design. Trusted
specialist associates join only
when the work needs them, all
working to our quality,
confidentiality and privacy
standards.

Selected work

Securing \$6 million in industry investment

CQ Building Supplies | Industry

Managed a complex government funding application that secured \$6 million through the Industry Partnership Program, from evidence base to final submission.

Health workforce intelligence for Queensland

CheckUP | Health

Workforce data analysis and annual industry reporting on Queensland's health and social assistance industry, in partnership since 2020.

Building data and policy capability

Australia Awards (DFAT) | International

Short courses for public sector leaders in the Philippines and Papua New Guinea, building knowledge management, data analytics and evidence-based policy skills. The 2025 Philippines course had 40 participants and was rated 4.8/5 overall.

Inaugural sector workforce survey

Q Shelter | Community services

Designed and delivered the first workforce survey for Queensland's housing and homelessness sector, informing wellbeing, retention and attraction strategies.

Workforce Connect Fund grant

WRIQ | Industry peak body

Funding support that secured a Workforce Connect Fund grant for the peak body of Queensland's waste management and resource recovery sector.

Whole-of-workforce data and AI capability

Primary Health Network | Health

Designing and delivering an AI and data literacy program across a PHN's workforce, grounded in its board-approved AI policy and data governance framework, with an eight-domain capability framework and a baseline awareness survey. Currently in delivery.

What our clients say

"They provide high quality, contemporary data and insights for the health and community services industry."

Ann Maree Liddy, Former Chief Executive Officer, CheckUP

"Their team expertly managed every aspect of a complex government funding application."

Paul Spicer, Managing Director, CQ Building Supplies

LEADERSHIP

Jeff Pang

Managing Director

Jeff leads every Ronan Analytics engagement. He brings senior director experience from the Australian Bureau of Statistics and Queensland Government, and works with government, health, community services and advanced manufacturing organisations across Queensland and the Asia-Pacific.

From 2022 to 2026 he chaired the Micah Projects Data Governance Committee, guiding how the Brisbane community organisation governs and uses its data.
